

CARBURETTOR CLEANER

SN90118-KS-34883

CARBURETTOR CLEANER is a specially formulated blend of cleansing and lubricating agents.

BENEFITS

- Removes oil, grease and fuel residues quickly and effectively from the carburetor intake.
- Cleans and degreases butterfly throttle valves as well as the internal and external parts of the idle speed actuators and carburettor.
- Lubricates all previously cleaned moving parts.
- Dries quick, precise and secure leaving absolutely no residue.

USAGE

Ideal in industry and workshop applications for repairs, assembly and routine maintenance.

DIRECTION

Shake well before use. Spray parts to be treated intensely from a distance of approx. 20 cm allowing the agent to dissolve, respectively evaporate. Air dry the parts.

DOSAGE

To be used whenever required. Repeat the treatment several times if deemed necessary.
